CALL 4 SDE21 CITIES!

THE CALL FOR THE NEXT SOLAR DECATHLON EUROPE HOST CITY IS OUT.

DELFT, 02_07_2018

The Energy Endeavour Foundation is soliciting cities to host the 2021 Solar Decathlon Europe, the ultimate international university-level competition for resource-responsible and energy-efficient architecture. In the footsteps of Madrid, Versailles and Szentendre, the next European host city will champion the SDE objectives & values of student-driven innovation & energy-efficiency.

In support of a growing and collective commitment to energy literacy, the Energy Endeavour Foundation is launching the official SDE21 Call for Cities, with a deadline for full applications set for November 2, 2018. Organisations interested in hosting the SDE21 are invited to visit the SDE website to download the official Call for Cities documentation <http://solardecathlon.eu/sde21-call-for-cities/>.

Initiated in 2002 by the United States Department of Energy, the Solar Decathlon is a university-level student competition for sustainable, energy-efficient architecture and engineering. Focusing on 10 contests, teams compete in the design, construction and management of individual, solar-powered, and resource-efficient homes. The houses are brought to the competition site ('solar village') and assembled within ten days. The site becomes an open forum and exhibition, where the houses are operated, demonstrated to the public, and evaluated by a jury of renowned international adjudicators. An international movement, editions of the Solar Decathlon competition take place in the U.S., Europe, China, Latin America, with upcoming editions scheduled for the Middle East and Africa. Through the SDE competition, thousands of decathletes majoring in architecture, engineering, finance, environmental science are learning by building, developing other skill sets contributing to their future professions, including teamwork, fundraising, project management and communication.

«THE SOLAR
DECATHLON EUROPE IS
INTREPID, INGENIOUS &
RESPONSIBLE.»

ENERGY ENDEAVOUR FOUNDATION

The designated SDE21 Host City will promote the educational, economic, and energy-security benefits of renewable energy, energy efficiency and resource responsibility by demonstrating technologies that can effectively be deployed in our fast-growing and future communities.

The Solar Decathlon Europe is stewarded by the Energy Endeavour Foundation, a Netherlands-based, non-profit organization which directs university research competitions and awareness activities in the fields of social, economic and environmental sustainability.
